Tunisian "Dunkirk" by Axis Now Practically Impossible

By ROBERT MUSEL

Exclusive to The Edmonton Bulletin

Copyright, 1943, by British United Press

LONDON, April 3.—The chances of a Tunisian "Dunkirk" by the Axis are practically nil, an expert who knows thoroughly how British officers worked their Dunkirk miracle, said today.

France Rising

Open Letter to Pierre Laval Gives Warning

LONDON, April 3.—(CP)—To the accomplishment of the sound effects—booming guns, rattle of machine-guns and roar of bombers—the Axis radio spokesman last night broadcast an open letter to Pierre Laval warning him that "France is rising from her grave."

Introduced as a spokesman of "France at War," he described the achievements of French troops fighting side by side with British and American troops.

"M. Laval," he intoned, "the Allies are pushing forward and the French nation is on the alert at this moment..."

IN FULL VICTORY
Not only you, Laval. There is not a Frenchman today who does not hold his head high at the thought of the French army fighting and our soldiers here in full victory.

"We have always spoken the truth and the truth will come to France on the bayonets of our soldiers."

Six Canuck Fliers Win Decorations

OTTAWA, April 3.—(CP)—Air force headquarters last night announced the award of decorations to four members of the R.C.A.F. serving overseas and two Canadians serving with the R.A.F.

The awards: George Medel, P.O. Harry Day, Lint, George Gien, Skak, D.F.C., P.O. Walter Scott, Skak, R.C.A.F. D.F.M., P.O. Sgt. Edward John Lewis, Gaden, O.C. D.F.M., P.O. Sgt. John McIntyre, McIntyre, O.C. A.F.C., Sgt. L. Howard Fortenier, McIntyre, O.C. A.F.C., P.O. Lt. Frank W. H. Darrington, Vancouver.

Marcel and Darrington are serving with the R.A.F.

"The award to Skak was announced previously from London."

Ottawa Is Urged to Enact Legislation On West Farm Debt

CALGARY, April 3.—(CP)—In the interests of peace, harmony and security in western Canada, the Dominion government should enact legislation providing for the exact legislation proposed by three western provincial governments and backed by federal officials.

to solve, as far as possible, the farm debt problem. J. E. Brownlie, vice-president of United Grain Growers, Ltd. and former Alberta premier, declared in an address to the Board of Trade yesterday.

Lone Raider

LONDON, April 3.—(CP)—An enemy raider, flying low over a coast town yesterday afternoon, opened fire with machine guns on several streets, it was reported early today. No casualties were reported.

By EDIE GILMORE

MOSCOW, April 3.—(AP)—

The Red Army, in a sweeping winter offensive now ended which is officially declared to have resulted in the killing of 850,000 Germans, has pushed its lines almost to Velich, 10 miles northwest of Smolensk on the central front, and within about 15 miles of White Russia, War maps published in the press disclosed today.

Hammering hard to drive the Germans from Kurland, a bridgehead in the Caucasus, the Russians have advanced to the eastern gulf, Novorossisk, the Black Sea naval base, are practicing the sea of Azov west of Rostov, the map disclosed.

The maps were the first full war maps ever printed in Moscow of the long Russian front.

Red Star, printing its first full page map, disclosed that Soviet gains were greater in some places than had been believed by observers.

Velich, still held by the Germans, is about 60 miles east of Novorossisk. The Russians captured the town in the winter and then began enlarging their gains southward.

Velich, about 10 miles from the sea, is on the Smolensk-Kurland railway.

The map showed the Russians were about 36 miles from Smolensk, the German headquarters, they were just northeast of Yartovo, a small town.

Eisenhower Says:

18th Army Group

Designation For

Tunisian Forces

By VIRGIL PINCKLEY

Exclusive to The Edmonton Bulletin

Copyright, 1943, by British United Press

LONDON, April 3.—Gen. Dwight D. Eisenhower, Allied supreme commander in North Africa, announced that his ground forces under command of Gen. Sir Harold Alexander would be known as the 18th Army Group. The designation was chosen by combining the 1st and 8th British Armies.

The campaign is now developing toward its climax, he said, and the fact that only limited victory on this front but the eventual conquest of all enemies.

Eisenhower issued this statement following his impressions after visits to the various sectors.

Gen. Alexander's 18th Army Group, currently composed of western and North African forces, continues to make satisfactory progress in its operations, he said, comprising four distinct elements.

DER FUEHRER'S

CHANCELLERY IS

REPORTED HIT

LONDON, April 3.—(AP)—

Reuters news agency dispatch from Stockholm said today that Hitler's chancellery was damaged in the last British bombing of Berlin Monday night.

The Berlin radio, in a broadcast recorded by the Associated Press in New York, said 20,000 persons were without shelter in Rotterdam as the result of the American bombing of that German-occupied city Wednesday.

LONDON, April 3.—(AP)—

British Gen. Bernard Freyberg, a New Zealand officer who Germany reported killed in the 1941 battle of Crete, proved himself very much alive by leaving the Italian front and flying to Tunisia, that was responsible for the rout of Rommel at Gabes.

By VIRGIL PINCKLEY

Exclusive to The Edmonton Bulletin

Copyright, 1943, by British United Press

LONDON, April 3.—(AP)—

Two large submarine bases on the French Atlantic coast, the double-hulled four-night weather-forecast built in the Anglo-American aerial offensive following the heavy attacks on the French coast at Bechem, the latter a steel and railway center in Germany's Ruhr.

Only two planes were lost in last night's raids and in subsidiary attacks on the coast.

Every type of bomb from two-pound blockbusters to two-pound incendiaries was utilized on the submarine pens, repair shops and other U-boat facilities of St. Nazaire and Brest, both of which already have been so badly battered by Anglo-American planes that the cities are believed to be on the point of moving the bases farther south in France.

Other Allied planes took over the main aerial offensive in daylight today, bombers and fighters were heard from the southeast coast in relays and bomb explosions were heard from the direction of the northeast coast of France or southern coast of Belgium.

The night raids against the submarine bases were timed to coincide with the intensification of Germany's U-boat warfare against Allied sea lanes in an attempt to break the increasing isolation of Europe off invasion.

Heavy Night Raids

R.A.F., Canuck

Almost "Army"

Opposition House Members
Rap Government Inspectors;
Claim Action Unjustified

By JAMES MCCOOK

OTTAWA, April 3.—(CP)—The House of Commons last night abandoned its usual Friday evening holiday to continue debate on supplementary estimates after an afternoon when opposition members urged action to increase old age pensions, and two criticized powers given an "army" of government inspectors.

Reiterating his position that upward adjustment of old age pensions was primarily a matter for the provinces, Finance Minister Ivesley said no consideration was being given to lowering the eligible age for such pensions during the war.

The Dominion contributes to old age pensions under an agreement with the provinces.

Mr. Ivesley said he believed lowering the age of eligibility would involve a large increase in expenditures and had not been considered since the war began.

CRITICIZE INSPECTORS

Criticism of inspectors and their powers came from J. G. Diefenbaker (Prog. Con., Lake George) and Hon. R. B. Hanson (Prog. Con., York Sudbury).

Mr. Diefenbaker, speaking specifically of inspectors under the cost-of-living bonus order-enactment, said Canada was reaching the position "where the government has an army of inspectors, investigators, and agents prowling around us, and to the whole country which I suggest is totally unjustified."

Mr. Hanson said inspectors under the order had the right to hold a preliminary inquiry. The right to examine persons orally without the inspector having the right to put them through the third degree.

A fundamental principle of British justice was being violated.

Agriculture Minister Gagner presented a resolution calling for an amendment to the wheat acreage reduction act.

Daily War Map—Exclusively in The
Edmonton Bulletin

Rommel appears to be withdrawing swiftly and in fairly good order from the Gabes bottleneck northward. His main problem at the moment is to save as much of his equipment as possible from the depredations of Allied aircraft and the shells of warships hammering the coastal road from their positions in the Gulf. The Americans appear to be having a good deal of difficulty clearing the hills country and driving the enemy down onto the plain, where they can attack him in the open. Unless they can soon do this, there is little hope of bringing Rommel to battle much south of Sousse.

The cost-of-living bonus payments. Mr. Mitchell said he would not stand for inspectors using third degree methods.

Mr. Hanson said he did not think regulations giving the inspectors the power they had should be passed by order-in-council.

He added: "It is possible to have a third degree, and have men sign documents under which they may later be prosecuted."

AUTHORIZED TO CHECK

Mr. Mitchell said the Labor department and the national war labor board had authorized inspectors to check and see that the cost-of-living bonus was being paid and that the money was being used for the purpose intended.

Mr. Mitchell said he was not sure if the inspectors had the authority to check the cost-of-living bonus payments.

SAVINGS DETAIL

Angus Macdonald (C.P.F., Vancouver) said that he had saved from this saving a detriment when he had had to apply for pensions. Those who had not practiced thrift obtained pensions easily.

"I suggest this puts a premium on the savings habit," he said.

The house approved an item of \$25,000 to provide for cost-of-living bonus payments to the public service.

LABOR MINISTER "AMAZED" AT CHANGE BY HANSON

OTTAWA, April 3.—(CP)—Labor Minister Mitchell said he was "amazed" at Hon. R. B. Hanson (Prog. Con., York Sudbury) speaking of government inspectors as using the "third degree" in examining employers on

"Canada's Largest Fire Mutual"

"We have been fighting this campaign as Allies since November for the forces in the United States since October for the Eighth Army Every British and American citizen has a right to draw pride and inspiration from the record which this united force is making for itself."

CONTINUOUS ACTION

"May we say that the British First Army have been in action almost since the first day of the year in North Africa."

"They have gone through the hardships of winter in the mountains and they have come out of it full of high spirits and determination in the days of the first winter in Tunisia we threw every man, every woman and every child available into the line to help the British forces."

"The record of the Eighth Army is too brilliant to need any praise. The most powerful forces of the desert and is still full of energy and the first blow is in the air. Every American shares the pride of the British in the inclusion of

New Legislation
On Debt Drafted
in Saskatchewan

REGINA, April 3.—(CP)—New debt legislation drafted by the Saskatchewan government to take the place of the provincial debt adjustment act, which was similar in principle to the Alberta act, declared ultra vires by the privy council, was outlined in the legislature yesterday by Attorney-General J. W. Estey.

A series of six bills constitutes the legislation which will, if passed, retain almost the same protection for debtor and creditor, as was exercised under the debt adjustment act. Mr. Estey said. The bills were before the assembly for second reading.

MEDIATION BOARD

Under the new legislation the debt adjustment board which operated under the debt adjustment act, would become a principal mediator board between debtor and creditor. It would have the power to force a debtor to pay his debts from taking land under tax liens.

The courts would be given the power to order a debtor to pay his debts from taking land under tax liens.

Judges would be given power to apply the installment plan of payment which was used by the court under the old act.

With regard to workers under lien agreements district court judges are empowered to vary their orders and grant extensions of time under proper circumstances.

The legislation also contains the power of the lieutenant-governor-in-council to make regulations individually or generally, for a period not exceeding two years.

Credit Board Is Criticized by Elmer E. Roper

CALGARY, April 3.—(CP)—The credit board, which is the present Alberta government's method of dealing with the credit of farmers, is being criticized by Elmer E. Roper, M.L.A., Edmonton provincial leader of the opposition.

Mr. Roper said the credit board was a public affair and should be made so.

"The Alberta government will not be able to get the credit of farmers out of the credit board," he said.

Mr. Roper said the credit board was a public affair and should be made so.

A Letter from Home!

The Northern Alberta Railway system is handling vast and varied quantities of traffic these days, heading north for use in war development projects. In the above picture N.A.R. officials inspect a train-load of equipment ready to pull out of the Dunvegan yards for Dawson Creek, B.C., the end of the line. In the picture from left to right are J. M. MacArthur, general manager; H. S. Hryhoriak, assistant superintendent; and J. H. Volland, yard master.

Regulations forbid individuals sending newspapers overseas. The Edmonton Bulletin prints the names of the week in letter form. This letter covers the period from March 29 to April 4. Clip it and send it to your loved ones and friends.

Dear

We were all thrilled the other day to hear about your big battle maneuvers overseas. . . . The papers were full of the part the army and air force played and quoted Lt. Col. A. G. L. McNaughton as saying that all Canadian Army maneuvers were fit and ready. This victory has set many records and with the arrival of April it has added one more to its impressive list of achievements. Forgetting the fact that it was carried out at a later date than in any previous year of which there is a record. The Arctic Line Company still is eating ice at Lake Wissman and will continue with the work until April 5 when the weather will be better and the weather permit further work.

Monday

Returning from Washington, D.C., today where he conferred with high army officials, Brig. Gen. A. O'Connor, officer commanding the United States Army Northwest Service Command, announced that the 25th Infantry Division, which was sent to the Philippines, had been ordered to return to the United States.

Mr. O'Connor said the 25th Infantry Division, which was sent to the Philippines, had been ordered to return to the United States.

15,000 Guns Produced By Gigantic Industry Non-Existent Three Years Ago Canadian Arsenals Supplying Heavy Artillery To Battlefronts World Over

The rear of Canada's guns is being heard today all around the world, on land, on sea, and in the air. Foreign to Canadian industry before the war, gun

manufacture is now being carried out in scores of plants from coast to coast. Above, a six-pounder anti-tank gun, important factor in Canada's program.

Workers put finishing touch to huge 4-inch naval gun. Of the 15,000 units produced in Canada to date, many have been naval guns. Factories turn out two types

of 4-inch guns, and three types of mounts to carry them. Manufacture of a gun is an extremely complex and exacting job, requiring painstaking planning.

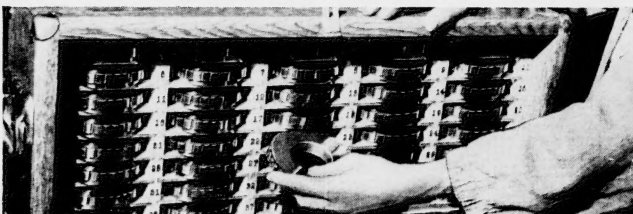

Fitting a breech on a lathe prior to rifling the barrel of the 4-inch. Over 50,000 are employed on gun and small arms production in primary plants.

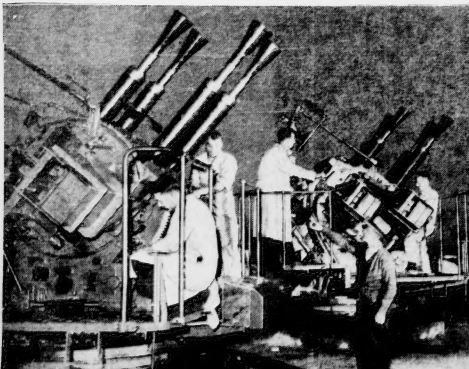

Heaviest land gun built in the Dominion is the mighty 3.7-inch ack-ack gun. One shown above is used on a Quebec proving range to test projectiles. This weapon weighs as much as a city bus, is a masterpiece of industrial technique.

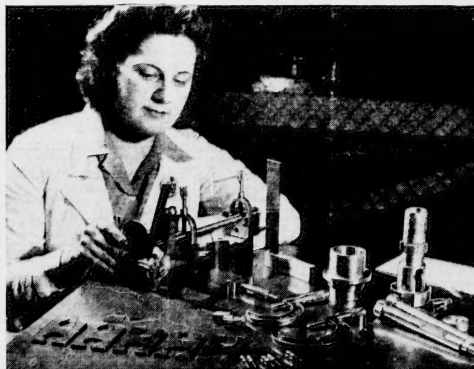

With 500,000 small arms turned out since the outbreak of the war, Canada is more than holding her own in the battle of production. Pictured above are Browning tank machine guns, one of the 12 types of small arms made in Canada.

An idea of the amount of work which goes into the making of a gun may be derived from above picture showing the 40 breeches needed to rifle the barrel of a 4-inch naval gun. Breeches are rotated through barrel, each removing a 1,000th of an inch of metal. This is reason why every gun takes months to build.

Canadian naval ordnance program features four types of guns, twelve types of mountings. Shown above in final stage of production are the huge quadric mounts for belt-fed, watercooled, Canadian-built 2-pounder naval gun-jobs.

Thousands of women are playing a vital role in Canada's artillery production drive, and doing a splendid job. They tackle virtually every job handed by men. This young miss inspects hundreds of parts which go into big naval guns.

The man from Mars is here again, welding a section of the 4.5 field gun carriage. Canadian factories supply 4 types of army guns, 6 types of mountings.

District News in Brief

McCullough Heads Red Deer Rotary

RED DEER—Dr. D. L. McCullough was elected president of the Red Deer Rotary club at the club's weekly meeting. He will succeed D. W. Robertson, president in office for a year. F. P. D. Rose was re-elected treasurer. A. Shadlock, Rev. A. S. Wood and J. J. Sellers were elected as directors.

A talk on a recent trip to Ottawa and Washington, D.C., was given by F. P. D. Rose, president of the Red Deer Rotary club, also speaker.

Guests at the meeting included Dr. MacGregor, Parsons, Earl Horley and D. E. Gray, president of the Red Deer Lions' club, and W. A. McKelvie, Winthrop.

Although they missed out on the Alberta Services Senior Hockey League playoffs, some of the Red Deer Army team are going to play some more hockey before they pack away their equipment. Six of the boys have left for Los Angeles, California, where they will play in an exhibition benefit game for the American Red Cross. They will play in the Victoria, B.C. Navy team, the trip: Art. J. Johnson, Tony, Sgt. Riley, (Mont) Miller, and Coach, Cpl. Dick Miller.

Also in the Victoria, B.C. Navy team, the trip: Art. J. Johnson, Tony, Sgt. Riley, (Mont) Miller, and Coach, Cpl. Dick Miller.

Also in the Victoria, B.C. Navy team, the trip: Art. J. Johnson, Tony, Sgt. Riley, (Mont) Miller, and Coach, Cpl. Dick Miller.

Also in the Victoria, B.C. Navy team, the trip: Art. J. Johnson, Tony, Sgt. Riley, (Mont) Miller, and Coach, Cpl. Dick Miller.

Also in the Victoria, B.C. Navy team, the trip: Art. J. Johnson, Tony, Sgt. Riley, (Mont) Miller, and Coach, Cpl. Dick Miller.

Active Role

Mark Anniversary

ROCKY MOUNTAIN HOUSE—Mr. and Mrs. J. J. McNeill of Rocky Mountain House, 20 miles south of town, celebrated their golden wedding anniversary recently when their children and friends arranged a surprise party at their home, and presented them with a roasting lamp, a dinner set and other gifts.

Mr. and Mrs. McNeill were married in Montana in 1882 and came to Rocky Mountain House 30 years ago. They have lived in Rocky Mountain House since then. Nine children and 10 grandchildren live in the district.

Const. R. A. McNeill left this week for Regina, where he will take a four week special course. In his absence, Const. J. Wilson is in charge of the local detachment.

The teenage girls of Miss Mary Rose's knitting club have made a complete layette and presented it to the Red Cross at the last meeting. The girls made and refitted them to raise money for materials, and want the layette sent to hospital babies in England. They did all the sewing and knitting themselves, meeting twice a week.

Mal. F. W. Kemp, director of the Edmonton Exhibition Association, in charge of attractions, who will take an active part in the forthcoming spring livestock show.

is the largest amount of material cut in operation here to date. A smaller crew of men will work during the summer at the planing mill.

CLIVE—R. A. Bell was guest of honor at a shower held recently in the 102 H.O. hall. Mr. and Mrs. J. Wilson, of Rocky Mountain House, were the hosts. The wedding of their son, Mr. J. Wilson, to Miss M. Wilson, of Rocky Mountain House, was celebrated on the 102 H.O. hall.

ROSALEND—Funeral services were held at Greenwood church recently for Mrs. Maudie of Rocky Mountain House. Mrs. Maudie was the wife of Mr. J. Wilson, of Rocky Mountain House.

COALSPUR—Wm. Flanagan, coalman, was the guest of honor at a dinner given by the C.N.R. at the Coalspur Hotel. Mr. Flanagan was the guest of honor at a dinner given by the C.N.R. at the Coalspur Hotel.

MOKINVILLE—Total amount raised in the dinner given by the C.N.R. at the Mokinville Hotel. The dinner was given by the C.N.R. at the Mokinville Hotel.

CLYDE—Ten people were sent to boys' camp by members of the C.N.R. at the Clyde Hotel. The boys' camp was held at the Clyde Hotel.

EVANSBURG—Tom Macgregor, of Evansburg, was the guest of honor at a dinner given by the C.N.R. at the Evansburg Hotel. The dinner was given by the C.N.R. at the Evansburg Hotel.

EVANSBURG—Tom Macgregor, of Evansburg, was the guest of honor at a dinner given by the C.N.R. at the Evansburg Hotel. The dinner was given by the C.N.R. at the Evansburg Hotel.

"I do not chase after every girl I see! Sometimes they're with other fellows!"

Beets and Carrots Save Garden Space; Surpluses Can Be Stored

Root crops should receive special consideration, on two counts, for planting in Victory Gardens. They yield large quantities of food for the ground space they occupy, and surplus from late crops can be stored for the next winter's meals.

For instance, a foot or row will produce three or four beets—the average garden grows about 100. A 50-foot row of beets is recommended for small Victory gardens. The seed in a foot of row is sufficient to grow 100 beets. The plants are about four inches high, thin them to about three inches apart. The thinned plants, by the way, will make good greens for table use. A lot of beets may be stored for the next winter's meals.

Carrots are also a good crop. A single packet of carrot seed will produce enough carrots to go a long way toward providing the servings of yellow vegetables that every diet should include. Plant the seeds in rows, about four inches apart. The plants are about four inches high, thin them to about three inches apart. The thinned plants, by the way, will make good greens for table use. A lot of carrots may be stored for the next winter's meals.

Carrots are also a good crop. A single packet of carrot seed will produce enough carrots to go a long way toward providing the servings of yellow vegetables that every diet should include. Plant a Victory

In normal times food production in Canada depends entirely on the farmer. This year, however, the city and urban dwellers are going to do their share.

Folks in the prairie provinces are keen over the federal government's Victory garden campaign. As one individual in Winnipeg, a citizen expressed it: "Yes, so we're really going to get down to earth this spring."

The planting of Victory gardens is an integral part of the Canada's greater food program is emphasized by Saskatchewan's minister of agriculture, J. G. T. Galt. The minister praises the efforts of the city of Regina in providing plots to assist war-time gardeners.

In Winnipeg, plans are underway to turn over city-owned vacant property to patriotic citizens to produce Victory gardens. People are being urged to come forward with a garden plot, and do their bit. Other cities across the prairie are doing the same thing.

Enquiries made at seed companies reveal more people are sending in orders this year than last. The companies are co-operating with the federal government by special advertising and by sending out circulars.

In view of the heavy demands, however, they advise customers to place their orders early. Folks who cultivated gardens last year are already rummaging in their basements for the seeds they saved from last fall, and those citizens who have never even handled a hoe or a spade before, are liberally being urged to plant the Victory garden.

One old gentleman, a banker, is sacrificing his lawnmower for the cause. He had heard the announcement that next winter may be a seed shortage of the vegetable and is determined not to be taken in. The banker, who comes from the Emerald Isle, remarked: "I'm not going to do short on my food supplies, even if it does mean giving up my lawnmower. I'll plant a Victory garden with a tinkle in my Irish eyes."

"Anyway," he said, "I'll kill the dandelions." Quite a number of apartment and suite dwellers are going to do their bit in the Victory garden campaign, too.

They can't grow vegetables, but they can help out with the herb shortage situation. They are having special window boxes made to grow sage, parsley, and thyme. These plants require very little space.

Folks who have never done gardening before and are a little hesitant about starting, are encouraged by the experiences of the late Mr. Pike. Pike was a well-known gardener and a member of the Victory garden campaign.

She tells her own story: "I moved into a house last year, I had never owned a garden. I alone planted one. I studied books, I asked advice from my neighbors, I got a lot of useful tips from a friendly neighbor. Gardening had been in my blood for years."

Spring Livestock Show Will Be Held April 6 to 8

Entries Beat Last Year, With Splendid Quality Shown in All Classes

The annual spring livestock show and sale of purebred bulls to be held at the Edmonton Exhibition Association's grounds on Tuesday, April 6 to 8 inclusive, promises to be the most successful in the recent history of the association.

C. E. Wilson, manager of the association stated Saturday that entries this year are well ahead of last, and that the quality of the animals to be shown exceeds previous records.

The show is being staged by the Edmonton Exhibition Association, assisted by the Alberta Cattle Breeders' and Horse Breeders' Associations, and the Alberta Department of Agriculture.

Mr. Wilson said that the wide area from which entries are being drawn this year. He said that entries had come in from as far north as St. Paul, Minn. to Bloodminister and west to Red Deer. The southern exhibitors are sending a large contingent to the show, he added.

The cream of northern Alberta's beef and dairy cattle will vie with main entries for the premiums offered by the association.

Mr. Wilson said that the wide area from which entries are being drawn this year. He said that entries had come in from as far north as St. Paul, Minn. to Bloodminister and west to Red Deer. The southern exhibitors are sending a large contingent to the show, he added.

Edmonton, World Air Centre, Pays Tribute to R.C.A.F. on Anniversary

December 16, 1939, Britain, Australia, New Zealand and Canada signed the agreement which launched the Empire's answer to the Luftwaffe's threat.

Now entering its fourth year the vast British Commonwealth Air Training Plan is pouring out the trained men who are gaining mastery of air.

Canada, through the Royal Canadian Air Force, is administrator of the vast plan. Air Marshal Power and Air Marshal Brender are the directing geniuses.

Construction work started this day after signing of the agreement. The plan has cost Canada a total of \$1.4 billion since. More than 140 men have been trained.

Typical of thousands of young Canadians constantly hammering Nazi Germany from the air is Flight Sgt. R. Birchall of St. Thomas, navigator of a Halifax.

They serve at home as well as overseas. Canada's coast, too, must be well protected. Kittyhawks and their pilots at a coastal fighter station are constantly ready for instant action at any hint of enemy activity. They also fly regular "sweeps" hunting U-boats, protecting shipping.

In Alaska RCAF graduates of the BCATP fly alongside U.S. forces. Typical pilot is 12-year-old "Mick" Stunias, Powell River, B.C., with Kittyhawk.

High over the great mountain ranges of Alaska speeds a flight of RCAF Kittyhawks, ready to meet in the air anything the Japs may send against the shores of

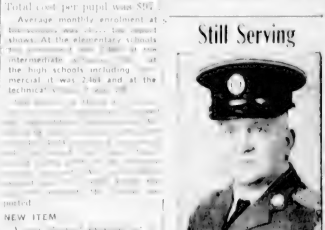

this northern outpost of the continent. Each day the aircraft of Canadian and United States forces cover many miles over dangerous mountain country, and the

lonely waters of the northern Pacific. In the case of a large scale invasion of North America by the Japanese it is probable that these aerial fighters

would be out in front to bear the first shock. They have already clashed with strong forces of the Japs and bombed his outposts on a number of occasions.

**Operating Expenditures
Of Public School Board
1942 Total \$1,391,519**

Operating expenditures during 1942 by the Edmonton Public School board totaled \$1,391,519 according to the annual report. The board has 100 schools, 20 of which are nonsectarian, and 80 are Catholic. The superintendent of schools Division of this sum among the different schools includes elementary schools, \$704,000.17, with a per pupil cost of \$82.94; intermediate schools, \$117,264.13, with \$14.03 per pupil; high schools, \$416,954.88, with \$47.73 per pupil; and technical schools, \$60,526.17, with \$7.07 per pupil.

One of a Corporal in Queen Mary's Own Hussars, and a former Brigade Sergeant at Petawawa Camp, who served with distinction in the First Great War, Sgt. Maj. Marshall now serves with the Old Imperial Frontiersmen, after his age brought discharge from the active army in the present war. He keeps his shooting eye in form with steady rifle practice and also takes riding excursions.

PLANS for Victory! AIM—Peace!

From civilian workers to fighting men the aim in this world struggle is for peace. On land, on sea and in the air men are making careful plans for bringing about a victory which will assure the world of peace again.

Every Canadian industry is doing its part in contributing to the aid of the United Nations—some through direct war production and all through taxes and Victory Loans.

As one of Canada's largest Garment Manufacturers, we are proud to have a leading part in the making of uniforms for our fighting men.

City Possesses Outstanding R.C.A.F. Recruiting Station

Highly-Trained Personnel Functions Smoothly as Fine Recruits Obtained

By P. O. DON MACMILLAN

Sqdn. Ldr. W. Paul Graham, commanding officer of No. 3 recruiting centre, Edmonton, has charge of one of the finest recruiting centres in the Dominion.

Judged on the excellence of the recruits obtained, its operation, efficiency and esprit de corps, the Edmonton centre ranked with the finest in Canada. Having just missed the efficiency pennant, the commanding officer, officers and men are determined to bring this award to Edmonton.

From his office Sqdn. Ldr. Graham looks out a bright, noisy recruiting centre that is spacious and efficiently lighted. With a medical room, women's division office, waiting room, general office, orderly room and individual offices for interviewing officers.

Upon first entering the recruiting centre, which is at 108th Ave., the visitor steps into the waiting room which has long benches on either side for recruits waiting for interviews and tests.

At the right is the "desk" where a recruit or other non-committed officer is stationed to greet the prospective recruit. If a recruit expresses a desire to join the R.C.A.F., he is given an application form to fill out. He is usually helped in this by the desk sergeant.

WOMEN'S DIVISION

The women's division section is separate and distinct from the general office. Sqdn. Ldr. Graham emphasizes this when showing the centre to visitors. A large sign in the waiting room points the way to the women's division offices, where well-trained and courteous officers interview all women who visit the centre for information.

There are two offices: an outer office which serves as a waiting room and an inner office where the applicant can talk privately with officers. No effort is spared to see that the women applicants are given every courtesy and attention. They can come and go from the recruiting centre in what amounts to complete privacy insofar as the rest of the centre is concerned. Delay and waiting are almost nonexistent as the women, in keeping with their importance in the R.C.A.F., have a section to themselves.

After the application form is filled out and checked, the applicant is ushered into a "rest room" and writes the general classification test. Following this, the male applicants proceed into the general office, while the women applicants proceed back to the women's division to have their interview there.

MEDICAL ROOMS

Another feature of this recruiting centre is the modern "medical" rooms. These are bright and fitted with the latest equipment. This is located at the back of the building. One or two days a week are reserved for women's medicals. Pictures of air force life, recruiting posters and airforce insignia brighten the walls of the recruiting centre which is finished in a blue and cream color scheme which blends very attractively with the uniforms of the personnel.

GIVES CREDIT

The present commanding officer, Sqdn. Ldr. Graham, gives an shining credit to the men who preceded him at the recruiting centre here. The centre was opened in September, 1938, with P.O. Hodge, a permanent force man, in charge. The quarters were in the same building, but very small. There was no equipment, no orders and very little information available. "Col. Hodge" was trade test N.C.O. and general information centre.

Group Captain A. Hutchison, O.B.E., then a flight lieutenant, arrived in Edmonton to assume command of the centre. He was followed by P.O. H. H. Christie and

Groups Depart For East Point Every Tuesday

Departure night at the R.C.A.F. Recruiting Centre in Edmonton for the new recruits in the women's division, leave, place every Tuesday night.

Each Tuesday, a new group leaves for Bucklefield, Ont., where they enter training depot for their first two years of life. The girls receive four weeks' basic training there, are supplied with uniforms and all clothing necessities, and then they proceed to trade training at one of the many R.C.A.F. trade schools in Canada.

Accounting clerks and equipment assistants go to Trenton, Ont. for six weeks. Hospital assistants go to St. Thomas for five weeks. Cooks go to the school of cookery at Guelph for seven or eight weeks. Code and cipher clerks also receive their training at Guelph.

Teleprinter operators spend two weeks and photographers 11 weeks at Ottawa, while wireless operators (ground) are given a six-month course at No. 1 Wireless school, Montreal. Meteorological observers take a month's course at the University of Toronto and trainees given in many other trades at No. 1 Composite Training school, Toronto.

Following trades training, air-

graduate of the University of Alberta.

These are the officers who, along with a large staff of capable men and women, administer the Edmonton centre.

Today it stands as one of the finest in Canada, equipped and prepared to give information and enlistment to all who apply.

Schools' Director

Capt. W. R. 'Wop' May, O.B.E., D.F.C., veteran northern pilot and ace of the First Great War who is still doing a big job for the Empire as head of the western division of Canadian Airways Training Ltd., operators of No. 2 Edmonton Air Observer School and other British Commonwealth Air Training Plan schools.

Women are posted to an R.C.A.F. station where advance arrangements have been made to their accommodation, messing, recreation, etc. Airwomen have their own barracks blocks and recreational facilities. They are in the charge of W.D. officers and N.C.O.s who are responsible for their education, discipline and welfare on the station.

More than 10,000 airwomen have been enlisted in the air force and they are now serving in England, Newfoundland and overseas as well as in Canada.

Seek Recruits For Enlistment In R.C.A.F. (W.D.)

Basic requirements for enlistment in the R.C.A.F. (Women's Division) are simple. They are as follows: A candidate for enlistment as an airwoman must have attained her 18th birthday and not have attained her 40th birthday; only applicants with outstanding qualifications are accepted between the ages of 31 and 45.

The minimum educational standard is high school entrance except where special qualifications are required as laid down for specific trades. Junior matriculation is necessary for some trades.

An applicant must be of good character with no record of conviction for any offence.

It is now possible to obtain a Canadian passport without leaving the Dominion.

The theoretical requirement is that the candidate be physically fit. The personal document required in support of an application is original evidence of date of birth. The applicant should, however, produce in the recruiting office a passport inspection a National Registration Certificate and proof of financial education.

Permanent Dominion civil servants are not considered for enlistment in a limited number of dependent sons under 18 years of age.

However, a woman who has under 16 or daughters under 17 years of age may be accepted by some other person and for women who are no longer liable for enlistment may be enlisted subject to loss through reduction of fatigue hours in production and control in war.

Trade Commissioner Inspects Big Plant

A distinguished trade commissioner, Mr. M. H. Abbott, inspected the big plant on the west coast of M. H. Abbott, trade commissioner, Canada, who is in charge of the trade commissioner's office in Edmonton.

Music Helps Work At Aircraft Plant

Workers at an aircraft plant in Edmonton are helped by music in their work.

Opening of the music service was held by the company officials, who are responsible for the industrial music service and the industrial music service and the industrial music service and the industrial music service.

Mr. M. H. Abbott, trade commissioner, Canada, who is in charge of the trade commissioner's office in Edmonton.

Air Force Needs Many Women Recruits During April

Airmen Plan For All-Out Assault on the Axis

In the watch room of a station in Britain, crew of an R.C.A.F. bomber check the course to the target somewhere in Germany. Canadian crews like these take part in every big raid on enemy territory, give the Hun convincing proof that this Dominion is, in truth, a giant "aerodrome of Democracy".

Under New Arrangement They Will Be Enlisted As Standard Tradeswomen

More than 100 women will be required by the Edmonton R.C.A.F. recruiting centre in April to fill the positions allotted this district by R.C.A.F. headquarters. From April 1, all women will be posted to No. 1 Manning Depot at Rockcliffe, Ont., leaving Edmonton each Tuesday from March 30 to April 1. Advance quotas are also expected in about 100 women's enlistment of school teachers and students, and dates deferred until the completion of the war on university terms.

Under a new arrangement the women's enlistment will be divided as standard trades, or with the exceptions of cooks and typists for the war emergency training plan. Women's trades include: electrician, mechanic, draughtsman, and others. The latter two categories will be enlisted direct to the field.

At the Manning Depot, women will be assigned to various trades, and will be given the same training as men. They will be placed in the grade for which they are best suited.

More than 100 women will be required by the Edmonton R.C.A.F. recruiting centre in April to fill the positions allotted this district by R.C.A.F. headquarters. From April 1, all women will be posted to No. 1 Manning Depot at Rockcliffe, Ont., leaving Edmonton each Tuesday from March 30 to April 1. Chain of Airports Links City to Alaska Territory.

Noted Gold Rush Trails Brought Back to Mind By Recent Construction

By WING CMDR. W. J. McFARLANE

Officer Commanding North West Staging Route, R.C.A.F.

In any discussion of the North West Staging Route, it will be appreciated that present activities and future plans must remain military secrets.

The North West Staging Route is a chain of airmen extending from Edmonton to the Alaska border, a distance of over 1,200 air miles, and as the name implies, it is operated after the manner of the old-time stage coach lines.

Each unit is operated and maintained by R.C.A.F. personnel in power, engineering, and flying. Between Vancouver, London, and the port of Seattle, the route is operated by the "Transport" Air Corps. At each stop on the route, the aircraft are refueled, the baggage and mail are transferred, and the maintenance of the aircraft is attended to.

To guarantee the continuous operation of the route, the aircraft are refueled at each stop, and the baggage and mail are transferred. The route is operated by the "Transport" Air Corps, and the maintenance of the aircraft is attended to by the "Transport" Air Corps.

Wings Abroad Achieves Success

R.C.A.F. "Wings Abroad" is title adopted by Canadian crew for the Wellington bomber shown at top, a veteran of at least 15 raids over enemy territory. Snappy crest shown below belongs to a Halifax with 25 raids to its credit.

Air Force Men Boost For Women

The men of the air force are the biggest boosters for the enlistment of women in their ranks. The enlistment of women in the R.C.A.F. has made it possible for hundreds of men to be released from active duty to return to their families.

Canada's young men of the air are fighting men, they proved it in the First Great War and they are proving it again. They are keen to be remustered.

Anti-Sabotage Bill Is Passed in U.S.

WASHINGTON, April 2.—Anti-Sabotage Bill providing the death penalty for commission of hostile acts was passed yesterday by the House of Representatives after the chamber heard charges and denied that it is a potential weapon for destroying free speech and freedom of the press.

That Men May Fly!

WOMEN READERS will notice that a large part of this supplement is devoted to the Women's Division of the Royal Canadian Air Force. This is as it should be because the Women of Canada are playing an ever increasing part in the British Commonwealth Air Training Plan.

Canada's men have come forward gladly and eagerly to fill the ranks of the R.C.A.F. Many are now in Aircrew duties. Many others have been forced, by necessity, to stay "on the ground" for important duties there.

Now they are looking to you to fill these ground crew jobs for them so that they too may fly. What's more, by serving men, you can hasten the day when loved ones can again come home.

If you want to help there is a place for you. Women between 18 and 45 are eligible. Call at the R.C.A.F. Recruiting Centre, 10048 101st Avenue, Edmonton and talk it over with a Women's Division officer there.

W. P. GRAHAM, Squadron Leader
Commanding Officer
No. 3 Recruiting Centre
Edmonton, Alta.

Alberta C.W.A.C. Officer Is Given Coast Appointment

EDMONTON, April 2.—(C.P.)—The Canadian Western Air Corps (C.W.A.C.) has appointed a new officer to the coast. The new officer is a former member of the Royal Canadian Air Force and has been serving in various capacities in the C.W.A.C. since its formation.

NAZIS SHOOT HORSE

LONDON, April 2.—(C.P.)—A German horse was shot by a Nazi soldier in a field near Berlin. The horse was a valuable breeding animal and was being used for work.

Plant Turns Out Manifold Products

The largest plant in Canada manufacturing women's products is turning out manifold products. The plant is located in Toronto and is owned by a Canadian company.

Girl Air Cadets May Be Organized

WING CMDR. H. E. LANSFORD, of the R.C.A.F., is planning to organize girl air cadets. The organization will provide training and discipline for young women.

Sound Films Aid Factory Workers

Designed to educate and educate the general worker in the factory, sound films are being shown in many factories. The films show the importance of safety and the role of the worker in the production process.

ANSWERING THE NEED FOR ...

In a war demanding overwhelming air supremacy, the need is for men better trained than any the enemy can send us the sky.

The United Nations have an answer to that need in the immense British Commonwealth Air Training Plan centered in Canada.

Canadian Pacific AIR LINES

Trained Air Men!

Another major war task of the company is the management and operation of five Aircraft and Engine Overhaul Plants under contract to the Department of Munitions and Supply for the servicing and repair of Royal Canadian Air Force equipment.

Back in 1940 the Canadian Pacific made another vital contribution to the United Nations war effort by pioneering the Atlantic ferry bomber service, now the R.C.A.F. Ferry Command.

Aeronautical Inspection for Suitability of Engines

Little Known but Vital Branch of Service Now Coming Into Its Own

By SQDN. LDR. S. H. MATHESON

Officer Commanding No. 18 Aeronautical Inspection District, R.C.A.F.

Function of an Aeronautical Inspection District deals primarily with inspection and suitability of aircraft or engines and any equipment pertaining thereto, such as accessories, armament, bombs, etc. That is, equipment necessary for the fighting of the war and the building of the air force.

A further function, naturally, deals with supplies used in everyday life on stations, and at the front, such lines as automobiles, boats, clothing, kitchen utensils and a thousand other small necessities. However, the chief interest would be for example, in the building and processing of new type fighting and training aircraft, new engines, engine equipment, guns, bombs, etc., all of which must be inspected and tested to ensure its suitability.

The A.I.D. inspector must not only examine the phrase "too little and too late" but he must also ensure that the equipment manufactured will be superior in quality to that which the enemy is using, and of the same time endeavor to see that it is the latest in what can be manufactured in Canada. The A.I. District, then, is a group of fully skilled technicians who are constantly ensuring that the Canadian warplane is producing the very best that is possible.

It will be the result, realized that ensuring such a large and varied field of equipment to be suitable results in a small team under ideal conditions, should consist of a

Edmonton Officer Is Spitfire Ace

Wing Commander Howard Blatchford, D.F.C., Edmonton youth, and son of the late Kenneth C. Blatchford, former mayor of Edmonton, who has been a terror to German pilots ever since the war started. He is now in the R.C.A.F. and after the struggle commenced he was with the immortal band of six heroes that fought and won the Battle of Britain against terrific odds.

skilled technician in every field of manufacture. This being impossible, the A.I. District consists of inspectors specially trained for this work, who act under the supervision and direction of engineering officers, the qualities of whom undergo a very careful selection.

GO TO SCHOOL

R.C.A.F. personnel who initially show the required tendencies in service, and have the necessary education, are sent to the A.I.D. inspectors school, where basic principles of inspection are inculcated. Upon completion of the course, the candidate is posted to a district where he is put to work with experienced inspectors, under the direction of the engineering officer in charge.

Thus, the young inspector gradually acquires his training received at the school to the practical applications which are made in the field, and in this way the standard of his inspection is established on a sound, practical basis.

CONSTANT LIAISON

Constant liaison between the A.I. district, the air training command and A.P.H.Q. ensure that necessary changes are effected as required, and that the article produced, be it

an aircraft or a suit of clothes, will be satisfactorily performed the appointed task.

This again brings up an interesting field, where the A.I. district must be familiar with all the requirements of an airplane, an engine or any other piece of equipment. In that not only are improvements made, recommended and studied by the A.I. district, ensuring that the Canadian manufactured products will always lead the field, but also in arranging if possible speedier means of manufacture. Thus ensuring that the phrase "too little and too late" will not be applicable where it is humanly possible to prevent it.

The duties of an A.I.D. inspector, therefore, are doubly important, as he is backing up his fighting comrades in the field; he is also ensuring that the lives of the youths undergoing training are safeguarded and at the same time is endeavoring to produce a maximum of manufacturing and repairing efficiently in the various contractor plants.

Behind this man is operating a staff of specially trained equipment and accounting personnel at the district headquarters and its various detachments. These are the men who ensure that the paper work in connection with this vital important job is in order and who are ensuring that the production of the article in hand is not being retarded due to red tape, and the thousand-and-one difficulties encountered in the handling and paying for of these articles.

Equipment and accounting personnel are responsible, not only for ensuring that the R.C.A.F. receives its equipment as required, at its proper cost, but also for processing and thus providing statistical

information. The responsibility that is vested in an officer is not to be taken lightly, and upon investigation will be found to be complete, that is to say upon the officers of the A.I. District rest the responsibility of the airworthiness or satisfactory quality of all of the work which is carried out in their district by civil contractors.

He is further responsible for the development of new manufacturing methods, speedier applications of existing facilities to promote greater production, the substitution of material not available for special parts by others which are available, and upon which depends the lives of the Canadian airman, as well as endeavoring to promote a sense of unity and co-operation among the various contractors for which he is responsible.

THE QUALIFICATIONS
Not every woman who enlists in the Royal Canadian Air Force can become a clerk-operational. The qualifications, in fact, are about the stiffest that any girl can expect to face. Not only is there a minimum age of sixteen, but a minimum educational requirement, and a strict recommendation from a well-known citizen or magistrate is also required. The age limit is between 18-20 years, each applicant must also have perfect hearing, good speech, and after being accepted must go through a thorough and difficult secret, optional, training course. But on its completion the girl is given the opportunity to do a real job for Canada's war effort. A job which is vital that each R.C.A.F. clerk-operational knows that, without doubt, she is making a very important contribution to the cause for which the United Nations have pledged their aid.

Women between 18 and 45, married or single, but without dependents, are needed in the air force now. By serving you receive a most active duty in the air.

Princess Alice Praises Women For Sacrifices

Here is a message to the women of Canada from Princess Alice, Countess of Athlone, Air Commandant, R.C.A.F. Women's Division:

"Canada's daughters, through the years, have always been eager to share with her sons whatever their country demanded of toil and sacrifice. Now comes a call, to all women throughout the Dominion, to join Canada's war effort to the utmost of their strength. It means sacrifice and hard work, but few women will fail to answer the challenge as they look across the oceans to the suffering peoples who are fighting so grimly for all they hold dear."

NEEDS WOMEN

"The R.C.A.F. needs women in its ranks to work shoulder to shoulder with the men. This offers useful work and an interesting life. It is not an easy one. It is the pride of the Women's Division that they accept the same conditions of service and living as the men. Indeed, service in the R.C.A.F. must fill everyone with a sense of deep satisfaction knowing, as each one must, that she is playing her part in a supreme effort to bring into being a better and happier world. "It is my privilege to be Air Com-

mandant of the Women's Division and as such I am happy to convey this message. I have inspected the depths, seen the conditions under which women work on a station and have been impressed by the enthusiasm and energy with which all ranks look forward to joining the Women's Division, growing in numbers and confidence as part of the Royal Canadian Air Force."

Women's Uniform Proves Attractive

The trim and natty uniforms of the women of the R.C.A.F. is becoming a familiar sight to many of the world, as the women of Canada play their part in helping the United Nations to win the war.

The women of the R.C.A.F. are not only in Canada but in New York, London, Glasgow, Belfast and the United States. This vital role in the war, however, is not a new one.

And now the R.C.A.F. women in ranks to even more recruits. It is an opportunity that every Canadian woman should investigate without delay.

Visit or write to the R.C.A.F. recruiting office at 1045 3rd Ave. Edmonton, and arrange for an interview.

There's a place in the R.C.A.F. for you.

Every woman who joins the R.C.A.F. receives a man-to-dress bonus on bills.

Women Make Sure Can Retain Secret

Some people say that a woman who keeps a secret has a conscience alert along Canadian roads and serving in Canada's war effort. These girls keep their secrets as well as their uniforms.

As a result of the war, the women of the R.C.A.F. are becoming a familiar sight to many of the world, as the women of Canada play their part in helping the United Nations to win the war.

The women of the R.C.A.F. are not only in Canada but in New York, London, Glasgow, Belfast and the United States. This vital role in the war, however, is not a new one.

And now the R.C.A.F. women in ranks to even more recruits. It is an opportunity that every Canadian woman should investigate without delay.

Exciting—And Revealing

By GRAHAM BARKER

Yesterday it was an automobile; today it's the back-to-the-train movement for all who wish to travel any distance. To those who were born in the railroad era, it is music to the ears; to those of the generation of automobiles and airplanes, this is a new, exciting, revealing experience.

Manning Raps Calgary Stand On Insurance

Calgary taxpayers will without doubt criticize the recommendation of their city commissioners to place fire insurance with private insurance companies rather than with the Alberta Government Insurance Office, states Hon. E. C. Manning, minister of trade and industry, in a press release issued today.

The subsequent decision of the Calgary city council to place all city fire insurance with private companies was not from 40 to 50 per cent more than the government office, but Mr. Manning said that the city council was not sufficiently informed.

TEXT OF STATEMENT

The full statement follows:

The reported decision of the Calgary city commissioners to recommend the placing of fire insurance with private companies was not from 40 to 50 per cent more than the government office, but Mr. Manning said that the city council was not sufficiently informed.

The subsequent decision of the Calgary city council to place all city fire insurance at a premium cost of 40 to 50 per cent more than the government office, but Mr. Manning said that the city council was not sufficiently informed.

The subsequent decision of the Calgary city council to place all city fire insurance at a premium cost of 40 to 50 per cent more than the government office, but Mr. Manning said that the city council was not sufficiently informed.

The subsequent decision of the Calgary city council to place all city fire insurance at a premium cost of 40 to 50 per cent more than the government office, but Mr. Manning said that the city council was not sufficiently informed.

The subsequent decision of the Calgary city council to place all city fire insurance at a premium cost of 40 to 50 per cent more than the government office, but Mr. Manning said that the city council was not sufficiently informed.

The subsequent decision of the Calgary city council to place all city fire insurance at a premium cost of 40 to 50 per cent more than the government office, but Mr. Manning said that the city council was not sufficiently informed.

PRIVATE BREGER ABROAD

"You, on the end of the whip that opinion of your face!"

School Board Gives Report For Year 1942

Continued from Page Nineteen
Necessary to increase the tax rate of 1941 as a sufficient corresponding increase took place in the assessment roll. The tax rate therefore remained at 26.75 mills and the assessment figure for 1942 reached one of \$30,399,993.

THE AVERAGE

Reports submitted by Mr. Sheppard, showed that the average enrolment for the calendar year 1942 showed a decrease from the corresponding figure for 1941. In 1941 the average was 14,601. The average per-pupil cost in 1942 was \$92.31.

In 32 men and 31 women are on leave of absence serving with the armed forces or doing war work. The board has decided to leave the employment of the board during the year 1942.

December 1942 there were 400 teachers in the employ of the board and of these 156 are men and 244 are women. No teachers are on exchange this year due to the war. Mrs. Alice Walker, who was sent on exchange to South Africa two years ago, is still there due to the danger involved in making the return trip.

LARGE INCREASE

There has been a large increase in the number of films shown in the schools during 1942. The number of films shown in the schools during 1942 was 1,221. This was an increase of 100 films over the number shown in 1941.

Total expenditure by the building and maintenance department during 1942 was \$53,852. This amount was spent on repairs and maintenance of the schools.

Reports of the medical department showed that 4,500 pupils were given complete physical examinations while out of this number 1,221 were found to have defects which were being treated by the board.

Dental examinations covering grades two to seven amounted to 2,575. Of these 1,221 were found to have defects which were being treated by the board.

Council Members

Ald. A. Bisset

For East Trip

Continued from Page Nineteen
willing to meet the government's requirement of transfer of property as a pre-condition to any agreement in kind. They expressed the opinion, however, that the land should return to the city when the homes were removed, or the land value repaid when sale of the house was effected.

SEES NEW PROBLEMS

Ald. Ainsley said that the grouping of the 200 homes in one district would create school accommodation and transportation problems that would have to be solved. He was of the opinion that such concentration would necessitate the erection of a new school. This would entail an expenditure of approximately \$200,000, he estimated, even if the materials and labor for the purpose were available.

Ald. V. J. Mitchell asked the commissioners if they had any recommendations to make to council concerning the question.

Mayor Fry said there was no doubt that the homes were needed badly in the city. He was of the opinion that it would be possible to obtain from the War Home Laid. some concessions as to the type of house to be built there.

Concessions had been made in other cities, he said, and quoted the fact that in Galt the temporary homes had been erected on wooden beams, for foundations, while in Vancouver concrete foundations were used.

Commissioner John Hodgson said it was impossible that 200 homes be erected here by War Home Laid. They are needed to enable the city to provide suitable accommodation for war workers living in one and two rooms and endeavoring to bring up their families in these cramped surroundings.

EASILY SOLD

He said that all homes built here could be sold readily, and could be where any soldier would prefer to the government through the erection of the 200 homes here, if a permanent home with his family is built," he said, "they can then return to the city and find their way to the government."

He informed that all ready more than 300 applications for permits to build homes had been received from private builders. These he said were being forwarded to Ottawa to secure the necessary permit to build from the construction controller, and also the priorities for the building of the homes.

It would appear that private building in Edmonton this year would exceed all records set in the war.

Ald. Sidney Parsons said that the extra cost of basements on the 200 homes would be approximately \$50,000, while the foundations proposed on the homes would cost \$10,000. This would mean an additional cost for basements of \$40,000. He said that he would be justified to give war workers here warm housing accommodation in the winter.

FLYING FOR FREEDOM

When a bomber unloads its deadly cargo over an enemy city, there's more than just the crew in the ship.

The mechanics who keep the motor in perfect condition are there in spirit. So are the radio technicians. And the airwomen who packed the parachutes. And the clerks in the operations room following the flight's course. And the men in the "crash boats" ready for errands of mercy. The whole Air Force, really—ground crew as well as air crew, stenographers and messwomen—has a hand in that flight. They're all "flying for freedom!"

We salute these gallant men and women of the Royal Canadian Air Force who serve their country without thought of self.

We salute, too, those eager Canadian youths in the Air Cadets—the Airmen of tomorrow!
